

Telegram Notification System

Professional Overview - Production team collaborate with R&D team produced a real time data event notification for internal team. Microsoft Server automated real time data event with .bat format.

Projects - Telegram Notification System with MS Server

Tech Stack & Github- <https://github.com/wiz0u/WTelegramClient#readme>

Contributions - Notification System synchronizes with server built in real time dashboard enhance internal team response time and productivity

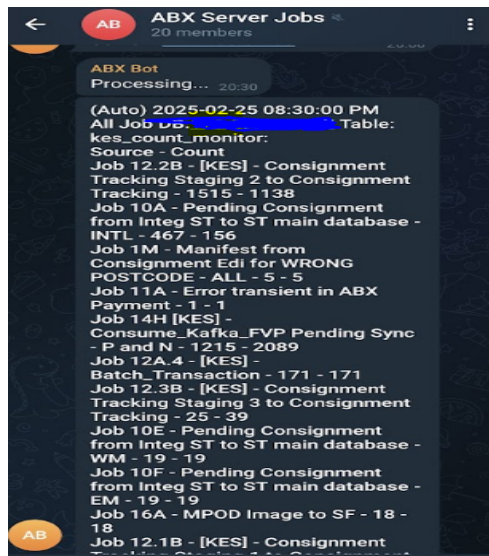

Challenges - complex configuration on connection server but luckily collaborate with senior .NET dev to overcome this technical issue.

Achievements- Implemented automated notification system to reduce data slowness feedback from users enhance team response and productivity in term of technical points.

Project Introduction

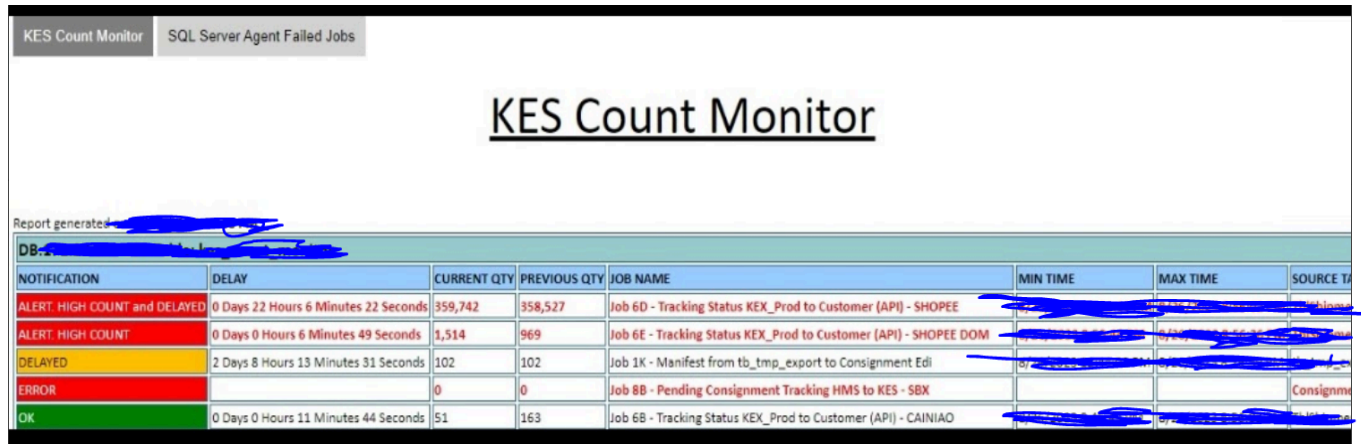

To overcome users receive data slowness issue, we implement some automated notification system to reduce data slowness feedback from users. With a little bit of knowledge and experience on API, I did some research on notification system on MS server batch format file to execute. I will share some screenshot of implemented result on notification system since I am not allowed to share some server sensitive information.

Modification on IIS Application pool .bat format file existing code collaborate with senior developer helps on deployment and debugs integrate with each job task server connection. Screenshot 1 shows each job task data flow each hour on Microsoft Server is synchronize with Telegram after set up configuration server path to enhance team production monitor.

Screenshot 1 shows automated Telegram job task bots response every hours

Screenshot 2 indicates KES COUNT Monitor is real time data monitor tools on each job task that displays as a dashboard for the internal team.

NOTIFICATION	DELAY	CURRENT QTY	PREVIOUS QTY	JOB NAME	MIN TIME	MAX TIME	SOURCE TZ
ALERT: HIGH COUNT and DELAYED	0 Days 22 Hours 6 Minutes 22 Seconds	359,742	358,527	Job 6D - Tracking Status KEX_Prod to Customer (API) - SHOPEE			
ALERT: HIGH COUNT	0 Days 0 Hours 6 Minutes 49 Seconds	1,514	969	Job 6E - Tracking Status KEX_Prod to Customer (API) - SHOPEE DOM			
DELAYED	2 Days 8 Hours 13 Minutes 31 Seconds	102	102	Job 1K - Manifest from tb_tmp_export to Consignment Edi			
ERROR		0	0	Job 8B - Pending Consignment Tracking HMS to KES - SBX			Consignme
OK	0 Days 0 Hours 11 Minutes 44 Seconds	51	163	Job 6B - Tracking Status KEX_Prod to Customer (API) - CAINIAO			

Screenshot 2 shows KES Monitor sync with real time data MS Server
